As a professional cricketer, I have always been passionate about people, sport, physical wellbeing and mental health. My academic background is in psychology where I completed a Bachelor of Arts degree at the University of Pretoria before further qualifying in sports massage therapy and exercise science through the Health & Fitness Professionals Association (HFPA). A focus of mine has always been to have a big impact in the sports and physical education space. This led me to become a Level 2 qualified ECB cricket coach and enrol for a PGCE at Senior Phase and FET level in South Africa which will be completed this December.
